

PUASAR024A - UNDERTAKE ROAD CRASH RESCUE

This unit covers the competency required to gain access to and extricate entrapped casualty/s from vehicles travelling on the road such as cars, motorcycles, buses, trucks and semi-trailers while minimising the potential for further injury and preserving the integrity of evidence.

This unit requires the responder to access entrapped casualty/s using a range of techniques and to operate specialist equipment to undertake the rescue.

You will learn about:

- dangers associated with vehicle safety devices
- documentation requirements
- emergency care
- equipment characteristics and safe working loads in rescue operations
- establishment and maintenance of safe working areas and minimisation of hazards
- hazards and environmental threats
- infection control procedures
- legal requirements for responders
- methods of access
- need to return equipment to operational readiness after use
- operating procedures and organisational standards
- operational briefing and debriefing procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- personal hygiene protocols
