

## PUASAR025A - UNDERTAKE CONFINED SPACE RESCUE

This unit covers the competency required to undertake rescue in confined spaces, as defined in AS 2865-2009 Confined spaces, as a member of a single agency or multi-disciplinary team.

The application of this unit in the workplace covers a range of confined space rescue situations. It is typically performed by personnel from emergency services and/or volunteer organisations or organisations where confined space work is undertaken.

You will learn about:

- Australian Standard (AS) 2865-2009 Confined spaces
- lock, tag out and isolation procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- potential occupational hazards and control measures
- procedures for atmospheric monitoring
- purging and ventilation in accordance with national standards
- selection, use and maintenance of respiratory devices
- use of ropes and knots for accessing confined space

**Entry Requirements** – You are required to hold PUASAR022A Participate in a rescue operation (Fire sector specific) and PUAFIR316 Identify, detect and monitor hazardous materials at an incident (Fire sector specific) before undertaking this training. We also strongly recommend that PUAFIR207B Operate breathing apparatus open circuit is completed beforehand.

NATIONALLY RECOGNISED
