

RIIRIS301D – APPLY RISK MANAGEMENT PROCESSES

This unit covers the application of risk management processes in resources and infrastructure industries. It includes identifying hazards; assessing and identifying unacceptable risk; identifying and recommending treatments; contributing to the implementation of treatments; and reviewing safety system documentation. Appropriate for those working in supervisory operational roles, or those functioning as members of committees or as safety and health representatives.

You will learn about:

- Relevant WHS legislation and regulations
- appropriate resources and infrastructure context and language
- topics or subject areas which are target for assessment and treatment
- site risk management systems and their application
- conventions and requirements for written communications including report writing
- problem solving techniques

Entry Requirements - There are no prerequisites for this course.

Language, literacy and numeracy requirements - Sufficient language skills to be able to communicate with others in a clear and concise manner. Enough literacy skills to be able to read and comply with work instructions and specifications.

Duration - Typically this course is conducted over one (1) day.
